Skills

Languages: JavaScript, Typescript,Python,Java
Frontend Development:HTML,CSS,Javascript,Tailwind,React,Redux,Nextjs
Backend Development: NodeJS,ExpressJS,SQL,PostgreSQL,MongoDB,Prisma,SocketIO

Experience

Gleamator Technologies

AWS Cloud Training Intern　　　　　　　　　　　　　　　　**April2025– May 2025**

- Gained hands-on experience in deploying static and dynamic web applications on AWS, utilizing services like EC2, S3, and Elastic Beanstalk.
- Explored and worked with various AWS tools and services (IAM, VPC, RDS, CloudFront, Lambda) to build secure, scalable, and cost-efficient cloud solutions. Gained exposure to VPC networking, Route 53 DNS management, and AWS security best practices.
- Actively participated in a hackathon organized by HKBK College of Engineering, focusing on frontend development and won . This experience allowed me to apply my skills in HTML, CSS and JavaScript to create a user-friendly interface for a real-world project.Additionally,I took part in another hackathon named Ixplorer

Projects

Socially |*Nextjs,Typescript,Prisma,PostgreSQL / Link*

- Built a **social media platform** with features for users to **create, edit, and delete posts**, along with **like, share, and save functionality**.
- Developed **user profiles** with **followers/following system**, displaying user posts, connections, and profile details.
- Designed a request-based follow system with **pending/accepted** states, allowing users to approve or reject follow requests before establishing follower/following relationships.
- Implemented using Next.js, Prisma, and PostgreSQL, ensuring a scalable, efficient, and responsive web application.

Job portal Application | *Nextjs,Typescript,Prisma,PostgreSQL / Link*

- Developed a full-stack job portal web application using Next.js and Prisma that enables: **Advanced job search** with filters for **location, job type, job title, and company.**
- A job posting system where users can submit vacancies, which are added to the listings after admin approval.

ChatApp| *ExpressJs,Javascript,SocketIo / Link*

- Developed a **real-time chat application** using **Express.js**, **JavaScript**, and **Socket.IO**, enabling users to **create and join chat rooms** for instant communication and collaboration.
- Implemented **live typing indicators** and **real-time message broadcasting**, enhancing user interactivity and providing a seamless chat experience across multiple clients.

Flowamzon | *Nextjs,Typescript,Prisma,MongoDB / Link*

- Developed a full-stack E-Cart web application using Next.js, Prisma ORM, and PostgreSQL with secure JWT-based authentication that enables: User authentication with JWT to ensure secure access and data protection.
- Cart functionality where authenticated users can add products, view items, and see **real-time totals and subtotals.**
- Orders page that allows users to place orders with **dynamic quantity selection** for each product, enabling flexible purchasing.
